The Genesis Mission - Executive Order 14363 - November 24, 2025

The U.S government created the **Genesis Mission** to compete with China's AI mission.

AI-AGI-ASI are now **classified** Manhattan Project style government teams such the **Genesis Mission**.

I refer to the Genesis Mission as the "Manhattan Project of AI".

Anything I have said about civilian AI progress is now pointless, as are CEO comments on the direction of their AI.

See **This page on the Genesis Mission** to see why.

Public Disclosure Due to the Genesis Project and Risk

The AI **Genesis Project** was launched 7 months after I published the first version of the AGI blueprint.

The date first published was April 20, 2025

I removed my disclosure PDF from the internet due to doubts my blueprint would ever be used by top labs despite 6,500 researcher downloads.

Recursive AI improvement created from a focused government pursuit such as Genesis changed the stakes, and my role.

Humans focused on who I was and my credentials. A government led team (Genesis) and AI itself will not.

If nothing else is read about me in the future, let it be this below. I used to think it over-the-top, now I know I need to post it.
